***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I-IV. Claims 1-4, drawn to a purified polynucleotide or fragment derived from a PS190 gene capable of hybridizing to a sequence, SEQ ID NO: 1, SEQ ID NO: 2, SEQ ID NO: 3 or SEQ ID NO: 4, respectively, classified in class 536, subclass 23.1.

V-X. Claims 5-7, drawn to a PS190 polypeptide, SEQ ID NO: 9, SEQ ID NO: 10, SEQ ID NO: 11, SEQ ID NO: 12, SEQ ID NO: 13 or SEQ ID NO: 14, respectively, classified in class 530, subclass 350.

XI-XVI. Claims 8 and 9, drawn to a method for detecting PS190 antigen in a test sample comprising contacting the test sample with an antibody which binds to an epitope of a PS190 antigen selected from the group consisting of SEQ ID NO: 9, SEQ ID NO: 10, SEQ ID NO: 11, SEQ ID NO: 12, SEQ ID NO: 13 or SEQ ID NO: 14, respectively, classified in class 435, subclass 7.1.

2. The inventions are distinct, each from the other because of the following reasons:

Groups I -X are structurally and functionally different products which are made by different methods and have different uses. The examination of all groups would require different searches in the U.S. Patent Shoes and the scientific literature and would require the consideration of different patentability issues.

The products of Groups I-IV are DNA, deoxyribonucleic acids, unbranched polymers composed of four subunits. However, the polypeptides of Groups V-X are linear order of amino acid residues.

The methods of Groups XI-XVI differ in the method objectives, method steps and parameters and in the reagents used. Each method requires the use of a separate and distinct epitope from different polypeptides.

Inventions V-X and XI-XVI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case any of the products of Groups V-X can be used not only in method groups XI-XVI, respectively but also in an *in vivo* gene therapy method.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mimi Goller on April 23, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
